REC'D 17 NOV 2003

WIPO

PCT

I, the undersigned, being an officer duly authorised in accordance with Section 74(1) and (4) of the Deregulation & Contracting Out Act 1994, to sign and issue certificates on behalf of the Comptroller-General, hereby certify that annexed hereto is a true copy of the documents as originally filed in connection with the patent application identified therein.

In accordance with the Patents (Companies Re-registration) Rules 1982, if a company named in this certificate and any accompanying documents has re-registered under the Companies Act 1980 with the same name as that with which it was registered immediately before re-registration save for the substitution as, or inclusion as, the last part of the name of the words "public limited company" or their equivalents in Welsh, references to the name of the company in this certificate and any accompanying documents shall be treated as references to the name with which it is so re-registered.

In accordance with the rules, the words "public limited company" may be replaced by p.l.c., plc, P.L.C. or PLC.

Re-registration under the Companies Act does not constitute a new legal entity but merely subjects the company to certain additional company law rules.

Warning

After an application for a patent has been filed, the Comptroller of the Patent Office will consider whether publication or communication of the invention should be prohibited or restricted under Section 22 of the Patents Act 1977. You will be informed if it is necessary to prohibit or restrict your invention in this way. Furthermore, if you live in the United Kingdom, Section 23 of the Patents Act 1977 stops you from applying for a patent abroad without first getting written permission from the Patent Office unless an application has been filed at least 6 weeks beforehand in the United Kingdom for a patent for the same invention and either no direction prohibiting publication or communication has been given, or any such direction has been revoked.

Notes

- If you need help to fill in this form or you have any questions, please contact the Patent Office on 08459 500505.
- Write your answers in capital letters using black ink or you may type them.
- If there is not enough space for all the relevant details on any part of this form, please continue on a separate sheet of paper and write "see continuation sheet" in the relevant part(s). Any continuation sheet should be attached to this form.
- If you have answered 'Yes' Patents Form 7/77 will need to be filed.
- Once you have filled in the form you must remember to sign and date it.
- For details of the fee and ways to pay please contact the Patent Office.

Light Vehicle Hygiene Membrane

This invention relates to a membrane which separates clean and unclean volumes in the context of food preparation within a light motor vehicle.

The modern car has satellite navigation, cruise control, radar parking sensors but they lack the facilities which the family with young children really require or the senior citizen needs. A vehicle is envisaged which contains sanitation and food preparation equipment. The small volume constraints of a light motor vehicle necessitates that the sanitary and food preparation volumes are immediately juxtaposed. To prevent the risk of contamination of the foodstuffs it is necessary to separate the sanitary and food preparation volumes.

Accordingly, this invention provides for a membrane to separate clean and unclean volumes. The volume within the membrane contained the sanitary equipment and is therefore considered unclean. The volume within the membrane is maintained at a pressure slightly below atmospheric pressure to prevent the escape of odour and contaminants. The membrane contains an aperture which permits light to enter the enclosed volume enabling the occupant to see whilst inside the membrane. The membrane contains an opening enabling a person to enter and exit the volume contained by the membrane. The opening is sufficiently large so as not to inhibit the evacuation of the volume contained by the membrane in the event of a vehicle fire.

The membrane as described in this invention is supported either directly or indirectly by the enclosing vehicle whilst it is being used to separate clean and unclean volumes. The membrane can be collapsed for storage within the enclosing vehicle whilst can being used to separate clean and unclean volumes.

A preferred embodiment of the invention will now be described with reference to the accompanying drawing in which:

- 1) The membrane 1 which encloses an unclean sanitary volume is displayed in a deployed configuration.
- 2) The membrane is supported by straps 5 attached directly or indirectly by the structure of the vehicle whilst in use and is collapsed for storage whilst not in use.
- 3) Ingress of air into the volume enclosed by the membrane may be through a porous membrane or via vents 2.
- 4) An opening 3 permits the entry and exit of the volume enclosed by the membrane by a person. The opening is sufficiently large so as not to inhibit evacuation in the event of a vehicle fire.
- 5) The membrane is opaque to light. Light may enter the volume enclosed by the membrane via aperture. The aperture consists of either a transparent material, translucent material or a vent.

Claims

- 1 A membrane which provides separation between clean and unclean volumes within a light motor vehicle.
- 2 A membrane as claimed in Claim 1 which contains a volume which is maintained at a pressure below atmospheric pressure.
- 3 A membrane as claimed in Claim 1 which permits the ingress of air by porous action or via one or more vents.
- 4 A membrane as claimed in Claim 1 which is opaque to light.
- 5 A membrane as claimed in Claim 1 which permits the ingress light through a transparent aperture or a translucent aperture or a vent.
- 6 A membrane as claimed in Claim 1 which is supported directly or indirectly by the structure of the enclosing vehicle.
- 7 A membrane as claimed in Claim 1 which may be collapsed for storage purposes within the enclosing vehicle.
- 8 A membrane as claimed in Claim 1 which contains an opening for the occupant to enter and exit the volume contained by the membrane.
- 9 An opening as claimed in Claim 8 which can be closed to prevent observation of the occupant of the volume contained by the membrane by a person external to the volume contained by the membrane.
- 10 An opening as claimed in Claim 8 which is sufficiently large so as not to hinder exit from the volume contained by the membrane in the event of a vehicle fire.
- 11 A membrane as claimed in any proceeding claim which can be made from natural fibre or plastic material or from a combination of these materials.
- 12 A membrane substantially as herein described above and illustrated in the accompanying drawings.

Abstract

Light Vehicle Hygiene Membrane

A membrane which separates the food preparation volumes from sanitary volume within a light vehicle. The membrane can be collapsed for storage whilst not in use. The unclean volume is maintained at a pressure below atmospheric pressure to prevent the emission of odour. The membrane contains an aperture of the ingress of light into the volume.
